Turks Insist Allied Fleet Has Silenced Minor Defenses Only.

GUNS ON THE HEIGHTS
DAMAGE BIG WARSHIPS

Constant Shifting of Land Batteries
Puzzles Attackers, whose Fire Is Unmethodical, Ottomans Say.

Correspondence of the Associated Press.
 CHANAK KALESSI (Dardanelles), March 12.—The first phase of the efforts of the British and French to force the Dardanelles demonstrated that this task is far more difficult than was supposed at first, according to Turkish opinion.

The heavy bombardments of March 6 and 7 of the defense works near this town and Kallid Bahr, as well as the futile attempts to clear the channel of mines the night of March 10-11, show that the waterway from the Mediterranean to Constantinople is better defended than British and French authorities may have thought.

For the last six days the works giving entrance to the Dardanelles have not been bombarded, and during the last two nights no serious attempt at mine clearing has been made.

While it is true that the allies have succeeded in silencing the forts at Kumkale and Sidi-El-Bahr and two positions of minor importance near there, it would be fallacious for the allies to assume that this had lessened materially the proportions of their task.

The positions at Kumkale and Sidi-El-Bahr were reduced easily, because it was possible to take them from the sea.

In addition, a slight advantage in range made it possible for the British to throw a weight of metal into these forts that almost from the first there was little chance that the Turks could hold them.

Allies Gained Little.
 But the allies have gained little by this thus far. Today Turkish infantry holds the ground about the silenced batteries. An attempt by the allies on March 4 to occupy Kumkale and Sidi-El-Bahr ended in a rout of a landing party, of which seventy were killed in action and others drowned.

The losses of the Turkish fleet at Sidi-El-Bahr, four killed, fourteen wounded; at Kumkale, two killed, twenty-one wounded.

The landing party of the allies was supported by a heavy fire from the British ships, which ventured so close to the Turkish guns that they were forced to retreat.

Meanwhile the expenditure of ammunition by the French and British has been prodigious. The Associated Press correspondent has been able to ascertain that it has led to small results.

On March 6-7 the British and French ships fired over 4,500 shells at the positions. On the whole the fire of the British vessels has been well directed, taking the artillerymen's point of view.

When the British and French have attained so far is attributed here to the longer range of their heavy guns and the fact that, unopposed by the Turkish guns, they were able to bring a heavier weight of fire to bear.

The ships were anchored, but kept circling about and, when the shells fell, they were able to remove them to a shorter range of the pieces in the forts, they have been able literally to cause a rain of shells.

GENERAL BATTLE LINE 20 40 60 80 100 120 MILES

LATEST GERMAN LOAN
TOTALS \$2,140,000,000

Every Dollar to Be Paid in Over a Period of Four Months—All Classes Subscribe.

Correspondence of the Associated Press.
 BERLIN, March 30.—The subscription of the second German war loan, which was completed March 19, denotes another high-water mark in the records of finance. When the first loan of September 1914 called out a total of \$1,060,000,000 it was said that this was the biggest thing the world had ever seen in the way of public loans.

Within a month or two, however, Great Britain eclipsed the German operation by floating a loan of \$1,750,000,000. Now Germany has just established a new record, the amount of subscriptions to its latest loan having reached the stupendous total of \$2,140,000,000.

To get the full significance of these figures it must be borne in mind that every dollar of this sum is to be actually paid in. Each subscriber put in his offer with the clear understanding that there were no speculative possibilities that might save him from paying the exact amount of his subscription.

Time for Floating Well Chosen.
 The time for floating the loan was well chosen, falling just after most of the dividends for 1914 had been announced and when April coupons on the bonds of all kinds were about to be paid.

Guilty of First-Degree Murder.
 DETROIT, Mich., April 12.—Mrs. Caroline E. Becker, sixty years old, was yesterday found guilty of murder in the first degree for having caused the death of Miss Frances Bonholt last December. Evidence given at the trial showed that Miss Bonholt was beaten to death with a large chunk of coal and that robbery was the motive for the crime. The case was given to the jury Saturday afternoon.

Public Health Service Institutes Stereopticon Loan Library.
 A stereopticon loan library, the first of the kind in a government department, has been established in the public health service. Thousands of slides have been collected, showing the various activities in the work of conserving the health of the country, and these have been classified, catalogued, duplicated and numbered. Books containing them are to be forwarded to responsible persons and institutions wishing to use them in any community service.

Later this public health campaign is to be enlarged by "canned" lectures, prepared addresses to be used with the slides, all to be lent for public use.

Chairman of American Commission Thinks Mine Probably Destroyed Relief Ship.
 LONDON, April 12.—Herbert C. Hoover, chairman of the American commission for relief in Belgium, said in an interview that he had received no official information concerning the blowing up of the steamer Harpalycy, but that he could not believe the vessel was torpedoed if she was flying the flag of the American relief commission.

"We have the distinct assurance of all the belligerents," said Mr. Hoover, "that the steamers engaged in this effort of mercy will not be molested. Personally, I think the disaster must have been caused by a mine."

The Daily Telegraph's Rotterdam correspondent gives an interview with Third Officer Llewellyn of the Harpalycy, who was on the bridge in command of the steamer at the time the vessel was sunk.

"Suddenly I heard a tremendous explosion," Llewellyn is quoted as having said, "and the ship heeled over. I looked down her side, and saw a tremendous hole, as if half the side of the ship had been blown out. The Harpal
